

Test Name

CHLAMYDIA / GONOCOCCUS, THINPREP

Synonyms

CT/GC, CT/NG

Intended Use / Indications

Detect *Chlamydia trachomatis* and/or *Neisseria gonorrhoeae* (GC) to aid in the diagnosis of chlamydial and/or gonococcal disease.

Methodology

Target amplification nucleic acid probe for rRNA

Test Code

1104

Specimen Type

ThinPrep liquid Pap specimen

Preferred Container

Entire ThinPrep vial, secured tightly

Temperature/Stability

Store 2-30°C; 30 days

Reject

SurePath, other specimens

Panel Includes

CHLAMYDIA TRACHOMATIS, NEISSERIA GONORRHOEAE

Limitations and Additional Information

The effects of tampon use or douching have not been assessed. Performance characteristics are available upon request.

Expected TAT: 3 days
